PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science graduate with hands-on experience building LLM-powered applications, Retrieval-Augmented Generation (RAG) pipelines, and agent-based workflows using LangChain, LangGraph, and OpenAI GPT-4. Proficient in Python, FastAPI, and Hugging Face Transformers, with a demonstrated ability to design and deploy end-to-end AI systems. Experienced in integrating multimodal LLMs with automation frameworks and building structured, production-oriented AI pipelines. Seeking to contribute to enterprise-grade generative AI solutions in a collaborative engineering environment.

KEY SKILLS

LLM Frameworks & Tools: LangChain, LangGraph, RAG pipeline design, OpenAI GPT-4, Anthropic Claude, Hugging Face Transformers

Prompt Engineering & RAG: Retrieval-Augmented Generation development, prompt design, agent workflows, tool & function calling

Backend & API Development: FastAPI, Python, REST API design

AI & Deep Learning: TensorFlow, CNNs, transformer-based NLP models, image classification, inference pipeline optimisation

Cloud & DevOps: Microsoft Azure (foundational), Git, GitHub, CI/CD concepts

Automation & Workflow Tools: Playwright, n8n, browser automation, multimodal LLM integration

Data & Analytics: NumPy, Pandas, SQL, Power BI, Microsoft Excel

Programming Languages: Python, Java, SQL

PROJECTS

SmartBrowser — AI-Powered Multimodal Browser Automation Framework with Deep Research Capabilities *Apr 2026*

- Engineered an AI-driven system that executes natural language tasks on live websites through automated browser control, applying LLM-based agent workflows to real-world automation challenges.
- Integrated multimodal LLMs with Playwright to enable intelligent navigation, contextual data extraction, and interactive end-to-end workflows, demonstrating hands-on experience with tool and function calling.
- Designed an agent-based execution pipeline with deep research capabilities for structured information gathering and automated report generation, aligned with enterprise AI solution design principles.

AI-Based Text Summarization — Hugging Face Transformers *Dec 2025*

- Implemented a transformer-based NLP model to generate concise, accurate summaries of lengthy documents using Hugging Face Transformers and Python.
- Optimised preprocessing and inference pipelines to improve processing efficiency, reflecting a strong understanding of inference performance and prompt optimisation principles.

AI-Based Skin Disease Detection — Deep Learning *Oct 2025*

- Built a Convolutional Neural Network (CNN) model to classify skin diseases from dermatological image data using TensorFlow.
- Applied image preprocessing and data augmentation techniques, improving classification accuracy and reducing overfitting.
- Developed a real-time prediction interface using Python and TensorFlow to deliver instant diagnostic feedback.

HireYou — Interview Preparation Website *Nov 2024*

- Designed and developed a responsive web platform using HTML, CSS, and JavaScript to support structured interview preparation.
- Curated domain-specific learning content spanning Data Science, Artificial Intelligence, Machine Learning, Statistics, and Aptitude.

EDUCATION

B.Tech, Artificial Intelligence and Data Science — K.L.N. College of Engineering, Sivagangai *Nov 2022 – May 2026*

CGPA: 8.02 / 10

HSC (Class XII), Computer Science — St. Joseph's Matriculation Higher Secondary School, Madurai *Jun 2020 – May 2022*

Score: 80%

CERTIFICATIONS

- Python Programming — hands-on experience in data structures, object-oriented programming, scripting, and data manipulation
- Structured Query Language (SQL) — practical knowledge of database management, joins, subqueries, aggregation, and query optimisation
- Microsoft Azure Cloud Computing — foundational understanding of cloud concepts, Azure services, virtual machines, storage, scalability, and security

ACTIVITIES & LEADERSHIP

- Treasurer, AISTHETICA 2K25 (National-Level Technical Symposium) — managed budgeting and financial coordination for a multi-event national symposium, demonstrating organisational and leadership capability.

CORE STRENGTHS

Communication | Problem Solving | Leadership | Time Management | Collaborative Teamwork
